

CamConnect Release Notes v1.1.0

CamConnect Release Notes

What's New in Your Camera App

Welcome to the latest version of CamConnect! We've packed this release with exciting features to make your camera experience smoother and more powerful.

Available Features

Smart Interface Layouts

Your camera app now adapts to how you want to use it:

- **Stream View** - Perfect for watching your camera feed with maximum screen space
- **Control View** - Balanced layout for easy access to camera controls while viewing
- **Settings View** - Full configuration panel for detailed camera adjustments

The app automatically switches between these views based on what you're doing!

Recording Features

Capture everything happening on your screen:

- **Screen Recording** - Record your entire phone screen including the camera feed
- **One-tap Recording** - Simple start/stop with visual recording indicator
- **Auto-save to Gallery** - All recordings are automatically saved to your phone's gallery
- **High Quality** - Records in HD quality with smooth 30fps playback

Camera Controls

Quick Camera Adjustments

- **Flip Camera** - Instantly flip your camera view horizontally or vertically (works immediately!)
- **Mirror View** - Mirror the camera image for selfie-style viewing (instant response!)

Advanced Camera Modes When you switch to manual camera mode, the app will reload the stream with your new settings:

Day Mode (Normal Lighting - IR-CUT-FILTER ON):

- *Stable Mode* - Electronic Image Stabilization (EIS) ON for smooth, steady video
- *Dynamic Range* - Wide Dynamic Range (WDR) ON for maximum detail in bright and dark areas
- *4K Vision* - EIS OFF, WDR OFF for ultra-high definition recording with maximum quality

IR Mode (Night Vision - IR-CUT-FILTER OFF, IR ON):

- *Stable Mode* - EIS ON, WDR OFF for steady night vision video
- *Dynamic Range* - EIS OFF, WDR ON for enhanced low-light visibility

- *4K Vision* - EIS OFF, WDR OFF for maximum quality night recording

Low-Light Mode: - Optimized settings for challenging lighting conditions

AI-Powered Detection

Smart features to help you see more:

- **Object Detection** - Automatically spots and highlights objects in your camera view (OFF by default)
- **Far Object Detection** - Detects objects at a distance (only available when Object Detection is ON)
- **Smart Overlays** - When AI is active, detection boxes scale perfectly with your zoom level

Note: When you change AI settings, the camera stream will reload to apply the new detection features.

Night Vision (IR Control)

Perfect visibility even in complete darkness:

- **Smart Cycling** - Tap the IR button to cycle through brightness levels:
 - First tap → LOW intensity
 - Second tap → MEDIUM intensity
 - Third tap → HIGH intensity
 - Fourth tap → MAX intensity
 - Fifth tap → ULTRA intensity
 - Sixth tap → OFF (cycles back to start)
- **Auto-adjustment** - Only activates in low-light or night conditions
- **Visual Feedback** - Button color changes to show current intensity level

Status Indicators

Stay informed about your device and connection:

- **Battery Level** - Shows your phone's battery percentage with color-coded warnings
- **WiFi Signal** - Real-time WiFi connection strength with signal bars
- **Network Status** - See if you're connected and online
- **AI Status** - Shows when smart detection features are active

Zoom & Navigation

Intuitive camera control:

- **Pinch to Zoom** - Use natural pinch gestures to zoom in/out on the camera feed (just like in your photo gallery!)
- **Smart Scaling** - When AI detection is active, all detection boxes zoom with the video
- **Double-tap Reset** - Double-tap to quickly return to normal zoom level
- **Smooth Panning** - Drag to move around when zoomed in

Settings & Configuration

Easy access to all camera options:

- **Multiple Layout Views** - Switch between different control layouts based on your needs
- **Camera Settings** - Adjust resolution, quality, and recording options
- **AI Configuration** - Turn detection features on/off as needed
- **Theme Support** - Works great in both light and dark mode

Coming in Future Updates

Features Planned for Next Release:

- **Manage Tab** - Advanced device management features
- **Picture-in-Picture Mode** - Watch your camera in a floating window
- **Enhanced Multi-camera Support** - Switch between multiple camera sources
- **Device Registration Flow** - Simplified camera setup process
- **User Login System** - Secure login to activate and manage camera licenses
- **License Management** - Easy license activation and management

- **Over-the-Air Updates (OTA)** - Automatic app updates delivered to your device

Developer Mode

For advanced users, we've included a Developer Mode that shows:

- System health status
- Performance metrics
- Advanced diagnostics

This feature is intended for technical users and troubleshooting.

Tips for Best Experience

1. **For Recording:** Make sure you have enough storage space on your device
2. **For Night Vision:** IR works best in completely dark environments

3. **For AI Detection:** Enable Object Detection first to unlock additional AI features
4. **For Zoom:** Use pinch gestures naturally - the app responds just like your photo gallery
5. **For Battery:** Keep an eye on the battery indicator during long recording sessions

Privacy & Security

Your privacy is important to us. All camera feeds and recordings stay on your device unless you choose to share them.

Thank you for using CamConnect! We're constantly working to improve your experience. Stay tuned for more exciting features in upcoming releases.

Version: 1.1.0
